Flag Presenter Select

Flag Presenter Select: professional hardware to stabilise large-sized portrait flags at any existing flagpole! The high-quality and durable system consists of a flexible carbon fibre rod and a tube made of aluminium which ensures flags to be fully unfolded up to 150 cm in width and up to 500 cm in height.

- high-grade system: consists of a flexible carbon fibre rod and a sturdy aluminium tube
- can be used even with larger flag sizes of up to 150 x 500 cm
- lightweight system with highest durability
- suitable for all flagpoles without banner arm
- quick assembly: simply insert the carbon fibre rod and the aluminium tube into the sleeves on the flag
- reusable
- can be used up to wind force 8 (47 mph, 75 km/h)

Flag Presenter Basic

The Flag Presenter Basic can be attached to any flagpole with an external halyard. An angle made of two aluminium tubes which are plugged together allows for perfect presentation of flags with widths of up to 150 cm. As the flag unfolds without any tension, their durability increases compared to similar portable banner arm systems. The Flag Presenter Basic keeps your flags always fluttering, even in areas with less wind.

- proven system made of sturdy aluminium tubes
- flag unfolds without tension
- applicable to all flagpoles with external halyard
- easy to assemble: insert the aluminium tubes into the sleeves of the flag and join them
- reusable
- can be used up to wind force 7 (38 mph, 60 km/h)
