# A-Frame

A-Frames are a perfect medium for portable outdoor advertising. They combine all the advantages of using smaller displays and large-scale barrier fences.

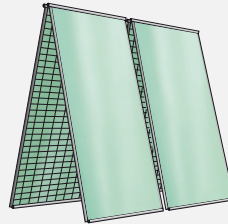

Various ground fittings for a wide range of grounds are available. This enables you to place barrier signage wherever you may need it. You can choose between single- or double-sided coverage of the fences and barriers. The banners can be fixed using cable ties.

## Arrangement options

as a single display

in a row

## Advantages

- versatile
- suitable for various grounds
- stable and sturdy
- can be dismantled for transportation
- quick exchangeable banners
- single- or double-sided coverage possible

Material	Concrete	Steel, galvanised
Weight	36.0 kg	2.9 kg
Number of pieces per barrier fence	4	4

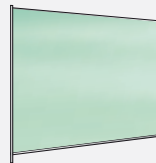

# Single Panels

Single Panels are the most common option when using barrier signage. Covered with customised banners, they offer tremendous space for advertising.

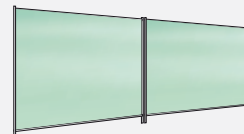

The uses of Single Panels are not just limited to construction sites. They can be placed anywhere, for every target market. Select your ground fitting and use them in a variety of environments. You can choose the arrangement, either single or even a row!

# Scaffold Advertising

Use scaffolds as a cost-efficient advertising space. Large-format banners for scaffolds are ideal to spread your message to a huge number of pedestrians. Construction companies, real estate companies and even shopkeepers alike choose scaffold advertising to promote their products and services.

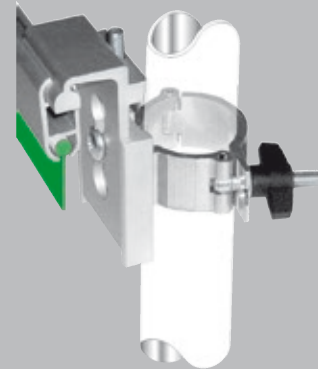

Despite their low weight, large-format banners for scaffolds are extremely weather-proof and sturdy, suitable for long-term outdoor use. Depending on your requirements you can choose between a variety of material options.

Scaffold Advertising	1 Scaffold level	2 Scaffold levels
<b>Sizes W x H</b>	200 x 205 cm 250 x 205 cm	200 x 410 cm 250 x 410 cm

<b>Finish</b>	<ul style="list-style-type: none"> <li>· top and bottom edge with sleeve for pole Ø 50 mm</li> <li>· all sides hemmed and eyeleted, a total of 6 eyelets</li> </ul>	<ul style="list-style-type: none"> <li>· top and bottom edge with sleeve for pole Ø 50 mm</li> <li>· all sides hemmed and eyeleted, a total of 10 eyelets</li> </ul>
<b>Fixation</b>	<ul style="list-style-type: none"> <li>· slide two horizontal scaffold poles through the sleeves of the banner</li> <li>· additional fixation with elastic cords or cable ties</li> </ul>	

**Please note**  
Mounting brackets are available to attach large-format banners with a maximum height of 800 cm.

- fixation at the top and bottom edge of the large-format banner
- for vertical or horizontal attachment to scaffold braces with Ø 48 - 50 mm

# Barrier Jackets and Fence Scrims

Crowd control barriers are used at many public events to guide visitors and to control large gatherings. Barrier Jackets and Fence Scrims turn the barriers into real eye-catchers. Customised with logos, messages or graphics, they offer efficient advertising space for companies, event organisers or sponsors.

Fence Scrims and Barrier Jackets are available in three different standard sizes. They fit to the most common crowd control barriers and barricades. The graphics get printed on sturdy, durable materials. The eyeleted Barrier Jackets and Fence Scrims can be quickly fixed to fences and barriers using cable ties, bungee ties or cord.
