# Non-woven polyester

efficient sales promotion for a good value

Non-woven polyester combines the best characteristics of paper, film and fabric. Thus the material is perfectly suited for indoor as well as for outdoor use. Banners made of non-woven polyester are often used as cost-effective branding opportunity at sports events or for campaign advertising indoor and outdoor.

Its basis weight makes non-woven polyester many times lighter than other substrates of the same weight. The material is exceedingly stable and has an extremely high resistance against wear and tear.

Non-woven polyester can be used unfinished! Only scissors are needed to cut the banner to required size. This can be done quick and easy, right on site. Attaching the banner to fences, scrims and handrails is quite simple using cable ties, nails, glue or staples!

Non-woven polyester can also be used unfinished:

- Simply cut to required length on site,
- attach the banner,
- done!

## Characteristics:

### Material:

- 100% thermofixated non-woven polyester, white
- fabric with a dense texture
- less translucent
- also available as flame retardant model according to fire class B1/DIN 4102

### Basis weight and consistency

- Basis weight approx. 150g/m<sup>2</sup>
- extremely resistant to wear and tear in wet and dry condition
- dimensionally stable

### Water resistance

- the material preserves its outstanding characteristics even in wet condition

### Temperature resistance

- the material remains smooth until -40°C

## Finish:

Basically, the material is printed continuously and delivered without any additional finishing. Based on the demand, banners of the desired length can be cut directly on site. For the fixation to fences and scaffolds it lasts to attach cable ties: The cable ties need only to be pierced through the non-woven material – ready! Therefore, consider a minimum distance of 2.5 cm to the edges of the banner.

On request, the banners can be fitted with eyelets at the top and bottom edge.

## Print:

- Digital printing: no minimum quantity
- Screen printing: minimum quantity 5 pieces

## Accessories: (optional)

### Cable ties

- set of 25 cable ties
- plastic, transparent
- Length: 430 mm, Width: 4.8 mm

### Cords

- set of 4 cords
- Polypropylene, white Ø 4.5 mm
- Length/cord 4 m

## Usage

Non-woven polyester is a very cost-effective and versatile material. It can be chosen for many kinds of products:

Indoor banners

Pallet covers

As we are constantly developing our products we reserve the right of changing technical issues and dimensional deviations.

Outdoor banner post kit
