Outdoor Banner Post Kit

The Outdoor Banner Post Kit is an ideal advertising medium in places where no fences, scaffolding or walls for mounting of billboards and banners are available. This simple and fast to assemble system can be used on all unpaved surfaces, like lawns, sand or earth. They offer up to 4m² of space for your message in parks, on fields or at the beach.

Both banner posts need only be driven into the ground. Afterwards, the banner can be fixed between the posts. Included guy ropes guarantee a safe stand of the entire system. The banner can be made of either PVC/Mesh, fabric or non-woven polyester, which is an extremely cost-efficient material. The Outdoor Banner Post Kit is also ideal for portable use, due to the small pack size it is easy to storage and transport.
